Profile

Energetic and enthusiastic Junior Front-End developer, who relishes a challenge and has a desire to learn and grow in a collaborative team environment. A graduate in Systems and Computer Engineering, keen to use my existing skills and to learn and improve in the software development industry. A good team player with a problem-solving mindset, very adaptive and flexible in every changing situation. Highly organised and efficient with great attention to detail, and aspiring to combine all technical skills to further develop and deliver the best solutions to the customers.

Key technical skills

- Mobile & Web Application Front-End
- JavaScript / Java / Flutter
- HTML5 / SASS / CSS3
- Git Version Control
- Hybrid App Framework: React
- API Integration
- SQL
- JIRA
- Agile
- Figma
- Windows/Linux/MacOS

Personal Competencies

- Enjoy building awesome projects and take great pleasure out of seeing things work.
- Good planning and every time manage deadlines.
- Focused for long periods of time.
- Competency to work under pressure and in a fast-paced environment.
- Building relationships in a team or individual working environment.

Achievements

- Design and develop an adaptive and responsive e-commerce website using React framework with Stripe payment system and integration of API for management of the products ([url](#)).
- Produced tuning visual elements of web applications by translating UI/UX design into code high quality, reusable markup using HTML5 / CSS3.
- Delivered responsive, cross-browser compatible and accessibility complaint websites.
- Ensure efficient web development by supporting designers and app developers while resolving website performance issues.

Employment History

April 2022 – present

Studying and working on own project using React

- Design and developing a prototype of e-commerce website using React.
- Implementing adaptive and responsive application design for all screens.
- Connecting different APIs and manage data through application using Redux.
- Implementing Stripe payment service and Commerc JS API.

January 2022 – April 2022

Studying and working on own project using Flutter

- Designed, implemented and tested Flutter project for all platforms (Web, IOS, Android).
- Using GetX state-management framework.
- Understanding and implementing Google Firebase
- Developing a prototype of e-commerce website using React.
- Connecting different APIs and manage data through application using Redux.

Sep 2019 – Jan 2022

Mitchellson Ltd (Construction) whilst working on own project – see above

July 2018 – June 2019

Custom Operation Agent at Orange Systems

- Researching and updating all required materials needed for clients and partners.
- Providing feedback to developers about issues occurred during settings changing.
- Providing quality reports to team leaders.
- Reviewing functional requirements.
- Working collaboratively with QA to improve quality.
- Analysis of technical specification of every customer profile.
- Improving operations and resolving issues to deliver top-notch customer service.

Education

January 2022 - April 2022

Java Programming, Step IT Academy

- Java Collection Framework
- Understanding of Java Multi-threading mechanisms
- Ability to apply the structural language of SQL queries
- Using the basics of creating server solutions using Java
- Ability to use the basics of software development using Java

September 2016 – June 2020

Bachelor of Engineering, Technical University of Moldova

- Developed and built a beta ticketing system programme for the management of cyber security incidents
- Participated in CTF hacking competitions
- Tested viruses in Sandbox
- Made small DDoS and monitoring victim site
- Made UML diagrams for software products
- Create and developed SQL database

- Learn C/C++ programming languages
